

Individual Inquiry Assignment

Think of a genetic condition you would like to learn more about.

Complete the following:

- What is the condition? Include symptoms and phenotype expression.
- What chromosome is the gene(s) on?
- What is the pattern of inheritance for this condition? (Complete dominance, incomplete dominance, co-dominance or sex linked).
- Is this condition more prevalent in specific populations and regions of the world.
- Discuss if there is a cure or treatment for this particular genetic condition.

Present your findings, using at least 2 multiple intelligences, in a manner of your choosing.
